

WT_EDKSOM6ULX-V1 System Upgrade

Revision history

Version	Date	Log
V0.9	2019/07/03	Create

1. Download image file

1.1 download dtb

```
wget https://raw.githubusercontent.com/industio/WT-EDKSOM6ULX-Linux/master/IMAGE/boot_evk.dtb
```

1.2 download image

```
wget https://raw.githubusercontent.com/industio/WT-EDKSOM6ULX-Linux/master/IMAGE/boot_evk.img
```

Then, copy the two file to TF card and insert the TF card into the WT_EDKSOM6ULX-V1 PCB.

2. System upgrade

Power on, the system will automatically upgrade and starts up after about 30s. Then pop up TF card.
